

mintychochip

Software engineer

github.com/mintychochip · mintychochip.dev

ABOUT

I design and build software that feels quiet on the outside and sharp underneath. I care about clean systems, readable code, and interfaces that respect attention.

EXPERIENCE

Independent software engineer

2022 — Present

Public projects

Design and ship software in the open: terminal tools, real-time canvas graphics, and small products that stay quiet on the outside and sharp underneath.

Creator

2025 — Present

ModularJobs

Building a modular job system with skill trees and RPG progression, published at jobs.mintychochip.dev.

SELECTED WORK

ModularJobs

Modular job system for Minecraft Paper servers with skill trees and RPG progression. jobs.mintychochip.dev
